Feature Introduction

Carrier w/ Nozzles

Moving carrier with smart nozzle design enables automatic material input and production outflow.

Spindle Motor

High-speed spindle motor to reduce mechanical stress during cutting (58,000 rpm).

Graphical User Interface

The user interface is based on the Windows GUI operating system and is easy to use. A CCD camera is also used to display a 10X image of the PCB to improve training precision.

Inlet Conveyor

Adjustable width to suit varies sizes of PCB panel.

Axial Motor

7 axis high precision/response AC servo motor and modular actuator.

Work Exchanger

This work exchanger provides an alternative in-and-out working space to limit the idle time, which in turn reaches the utmost output value.

Dust Suction Duct

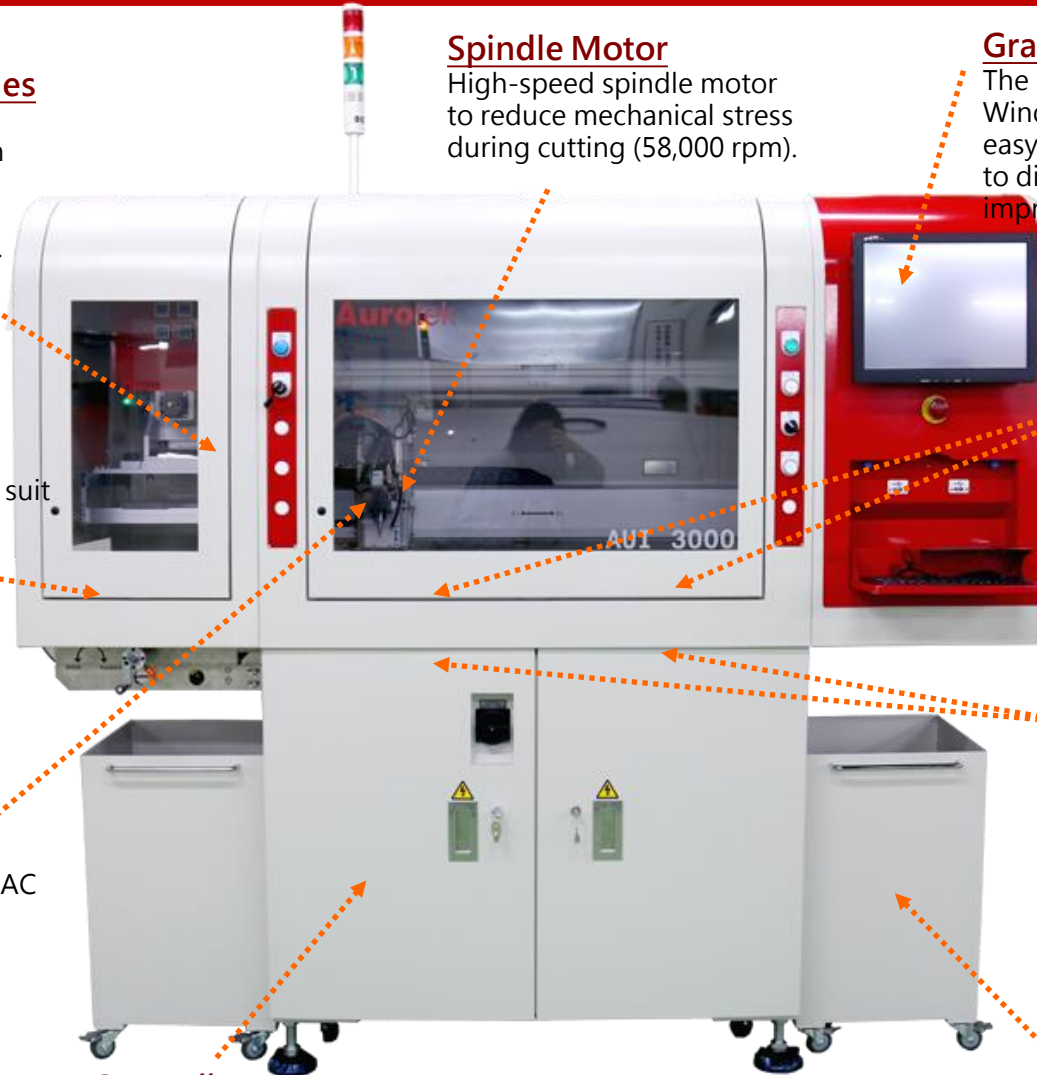

Design from the Principle of Fluid Dynamics. Collecting dust and fragments effectively in downward direction.

Waste Bins

Large Volume bins to receive major waste PCB fragments after cutting.

Controller

2 PC-based 7-axis motion controller.

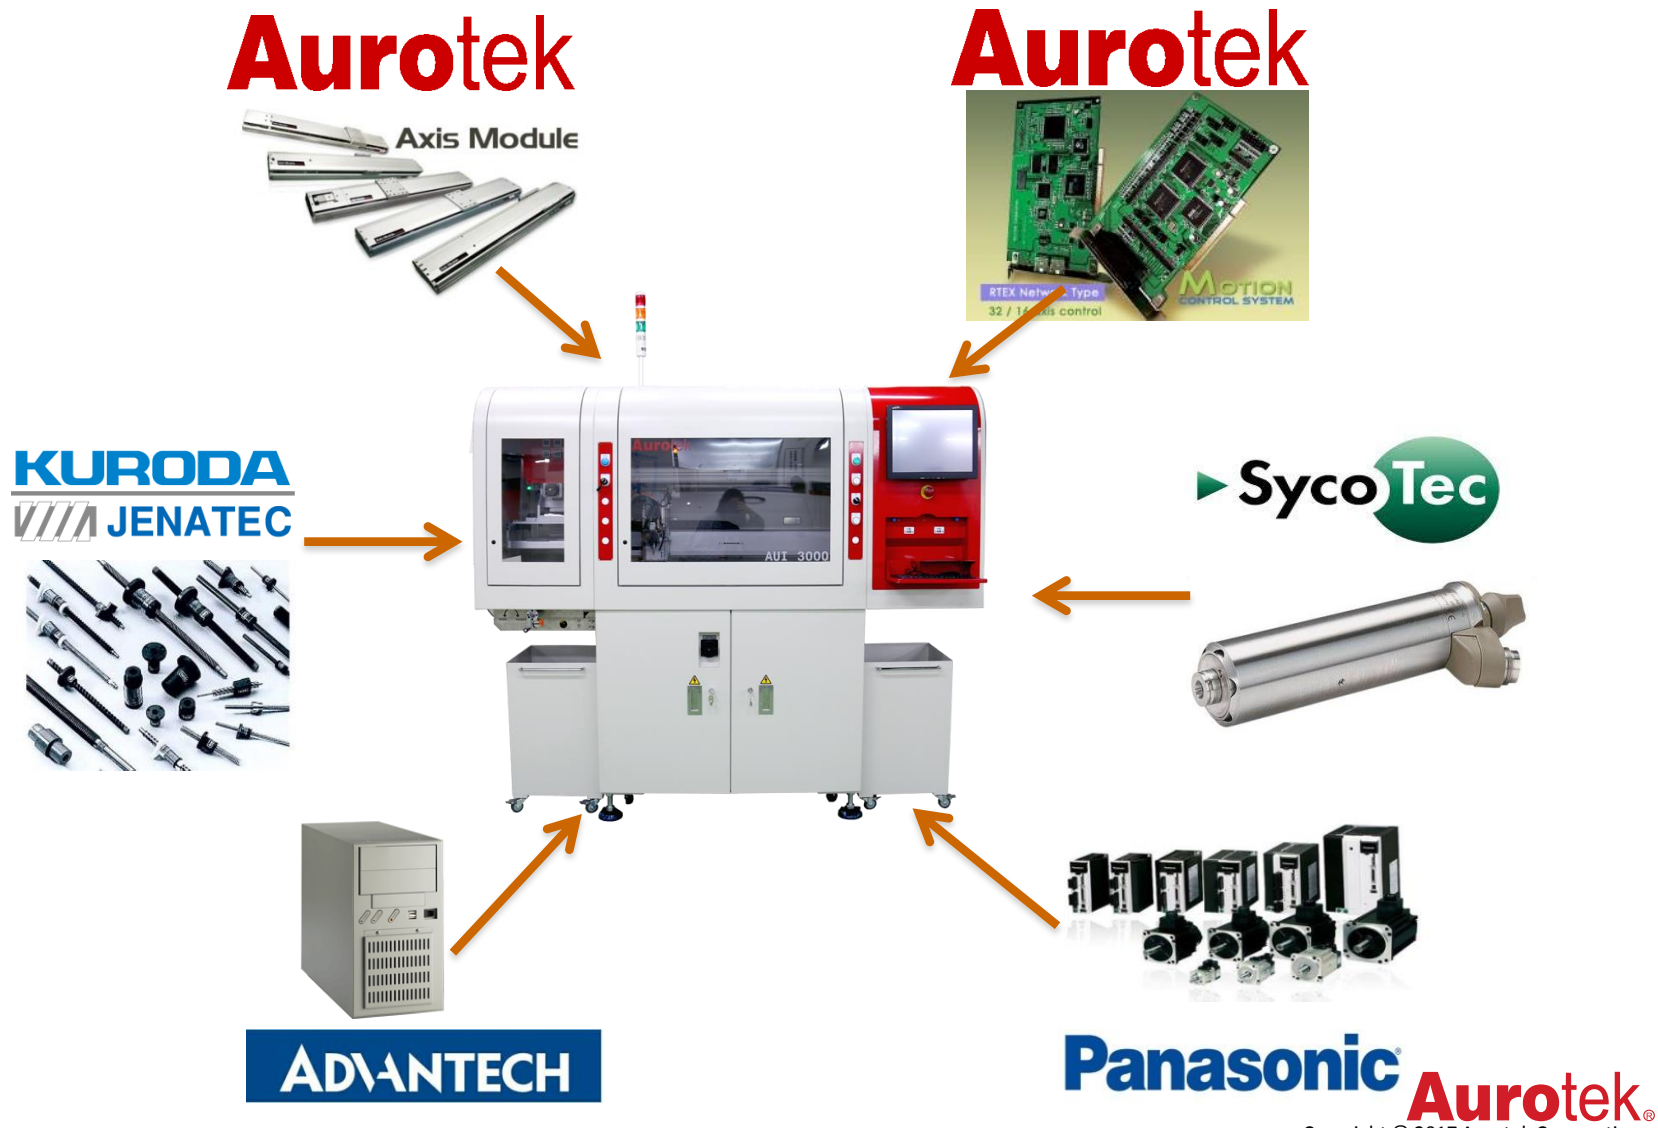

Specification

	AUI 3000	AUI 4000	AUI 5000
Table	2	2	1
Working Area	X:330mm, Y:350mm,	X: 430mm, Y: 450mm,	X: 630mm, Y: 550mm
.	X:100mm, Y:100mm	X:100mm, Y:100mm	X:100mm, Y:100mm
Component	Top side : 15mm Bottom side : 45mm		
PCB Thickness	0.5 to 3.0 mm		
Cutting Accuracy	± 0.08 mm		
Position Accuracy	± 10 µm		
Position Repeatability	± 20 µm		
Driving Speed	X, YL, YR : 1200mm/sec, Z: 750mm/sec (MAX)		
Cutting Speed	X, Y, Z: 100mm/sec (MAX)		
Spindle Motor	Standard: 4026, 265W, (Max.) 58,000 rpm, Torque: 4.5 Ncm Optional 1: 4025DC-T, 470W, (Max.) 30,000 rpm, Torque: 15 Ncm Optional 2: AP 008-ESD, 500W, (Max.) 80,000 rpm, Torque: 8.4 Ncm)		
Cutting Ability	Linear, Circular, U-curve, Arc, L-curve		
Route Planning	Direct coordinate input or manual guiding with × 10 CCD camera		

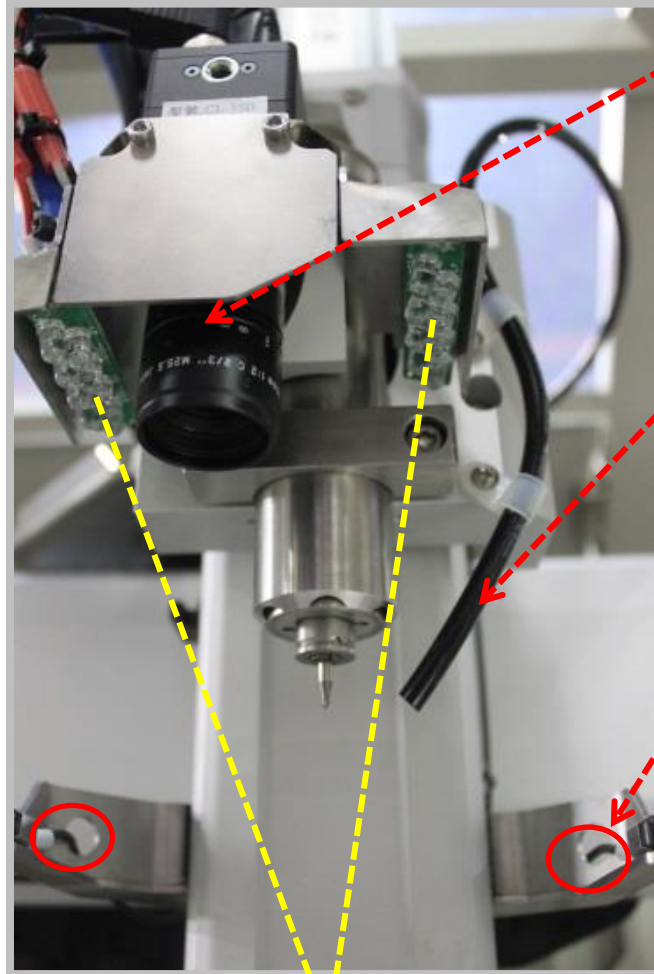

Specification

	AUI 3000	AUI 4000	AUI 5000
OS	Windows 7		
Servo Driver	Panasonic A6 400W		
Conveyor width	Min: 100mm		
Conveyor weight	2 Kgs	2 Kgs	3 Kgs
Load/ Unload	Automatic		
Power Supply	3 Phase AC220V±5% 50 Hz/60Hz, 4.0 kw		
Pneumatic	0.5Mpa (5 Bar)		
Dimension (W*D*H)	1974*1120*1720 mm + Signal Light 561 mm	2374*1334*1720 mm + Signal Light 561 mm	2572*1583*1720 mm + Signal Light 561 mm
Net Weight	680 Kgs	840 Kgs	860 Kgs
Base Height	890~940mm		
Dust Collector	5 HP Vacuum Cleaner		

Advantageous Genes

Equipment Overview

CCD camera & LED

CCD assists the coordinate setting for routing path making.

Ionizer

Ionizer reduces electrostatic discharge effectively.

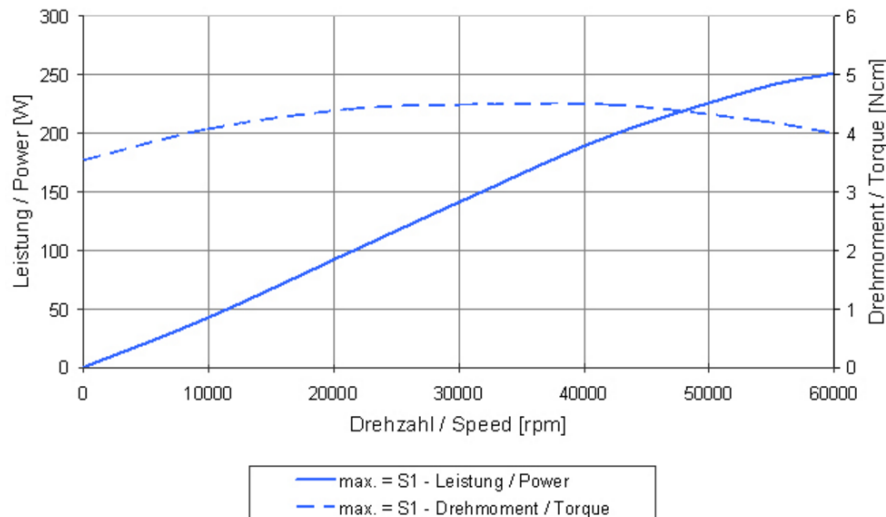

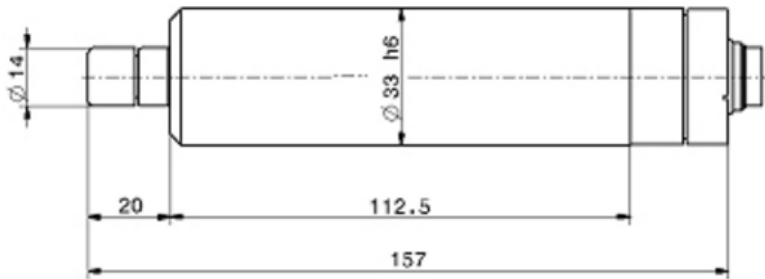

Bit break/ slide check sensor

A Sensor detects bit break or slide after each routing.

LED lights

Equipment Overview

SycoTec 4026 Spindle

Speed range: 5,000~60,000 rpm

Torque: 4.5 Ncm

Frequency: 83~1,000 Hz

Power: 265W

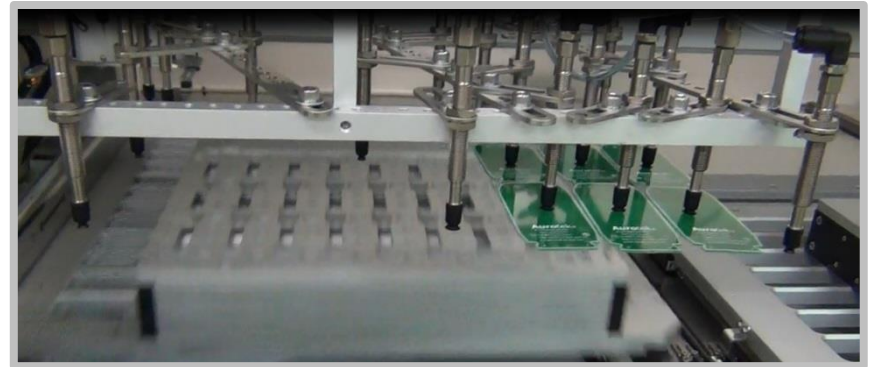

Equipment Overview

Carrier & P/P Axis

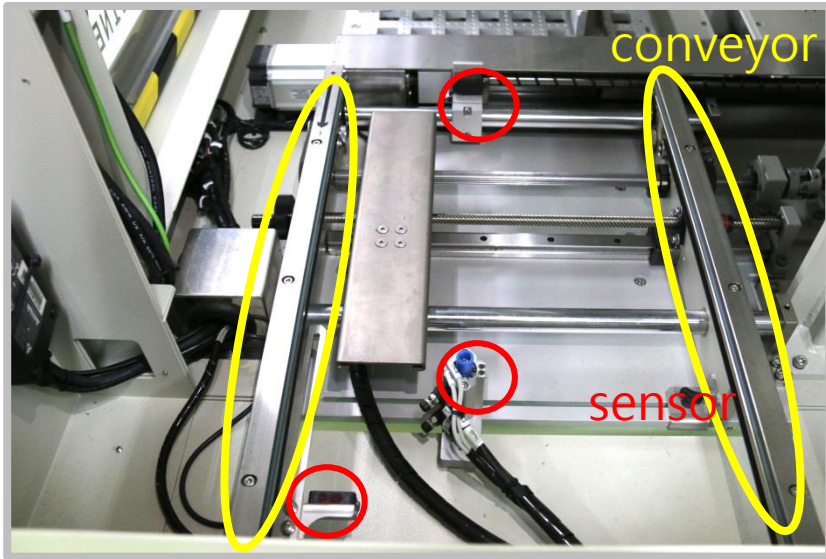

Carrier and Pick & Place Axis

With Carrier & P/P Axis it could move PCB from inlet conveyor to standby working table precisely; After routing.

Equipment Overview

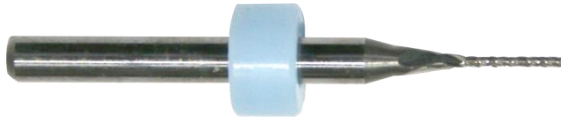

Inlet Conveyor & Sensor

Adjustable width of conveyor to meet various sizes of PCB panel.

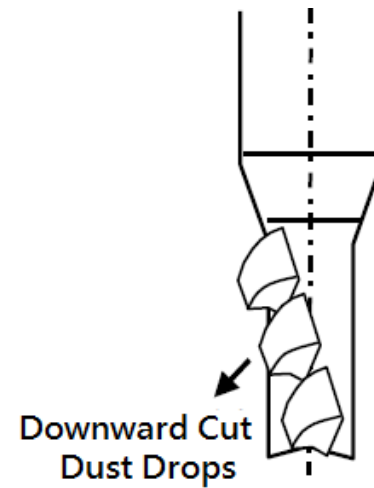

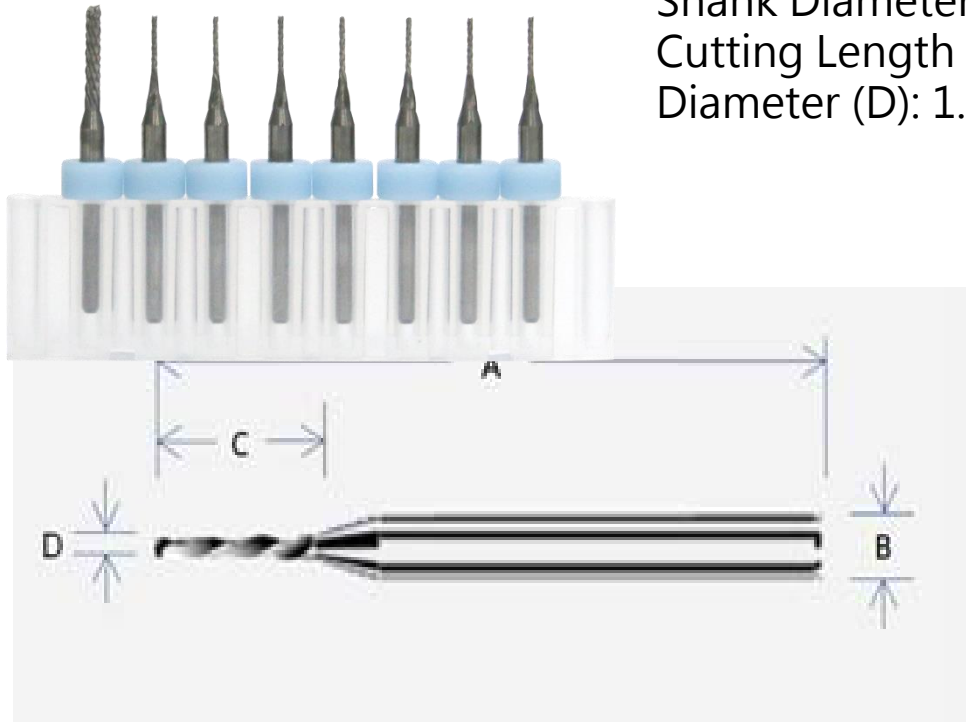

Auto width adjustment (set by software) is option

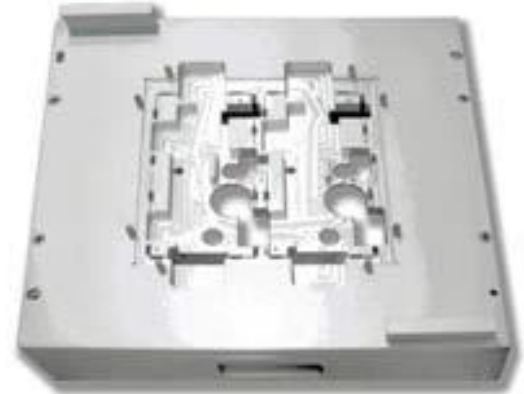

Routing Bit

LCF; Down Cut; Carbide end mills
Overall Length (A): 38.2 ± 0.30 mm
Shank Diameter (B): 3.175 mm
Cutting Length (C): 6 ± 0.50 mm
Diameter (D): 1.00 1.20 1.50 1.60 2.00 mm

Specific Fixture

Specific Jig

Inline router must equip with specific jig, for more stable and accurate routing environment.

Cost will be evaluated case by case.

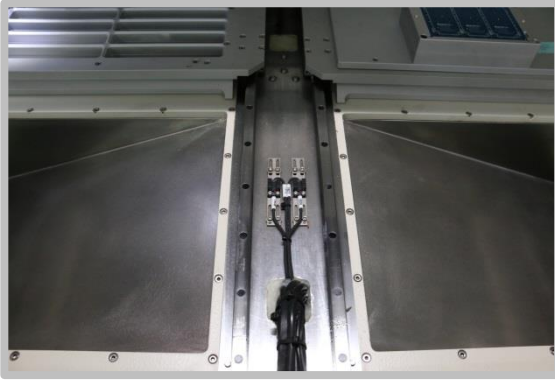

Dust Collector

High horse power motor (5HP) & high efficiency fan ensure the suction with excellent efficiency for the dust collector

Type	YSF-V605
Dimensions (WxDxH)	780x665x1900mm
Weight	230 kg
Power Supply	3 phase 50Hz / 60Hz 220V
	3.7 kw
Motor Power	5 HP
Inlet Wind Speed	28m/sec
Inlet Wind Capacity	40 m ³ /min
Inlet Wind Pressure	300 mm-Ag
Inlet Diameter	150mm
Outlet Diameter	203mm

Features- Waste Ramp and Bin

Waste Ramp & Bin

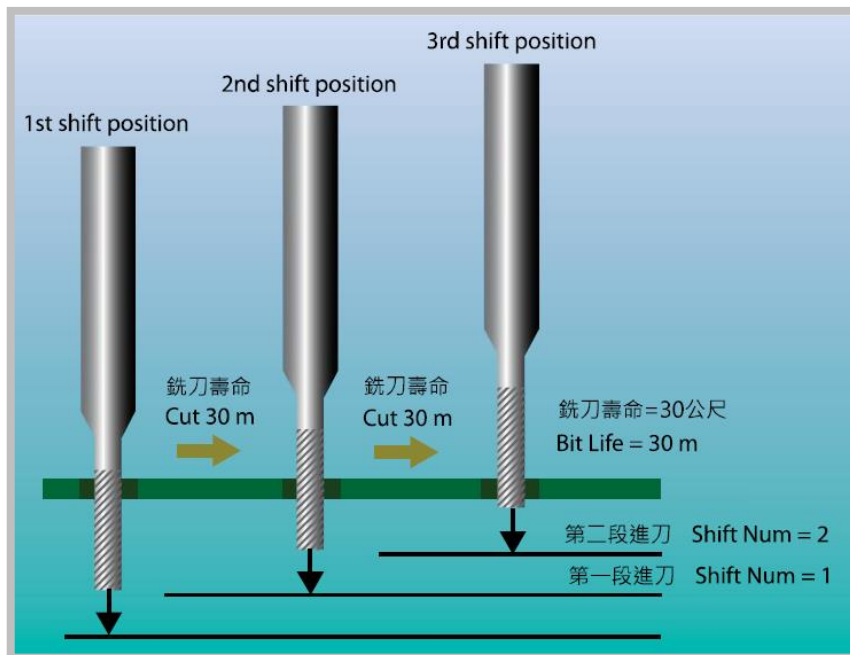

After finishing depaneling, waste fragments would be dropped to waste ramp under work stations, all the way down to the waste bins on both sides.

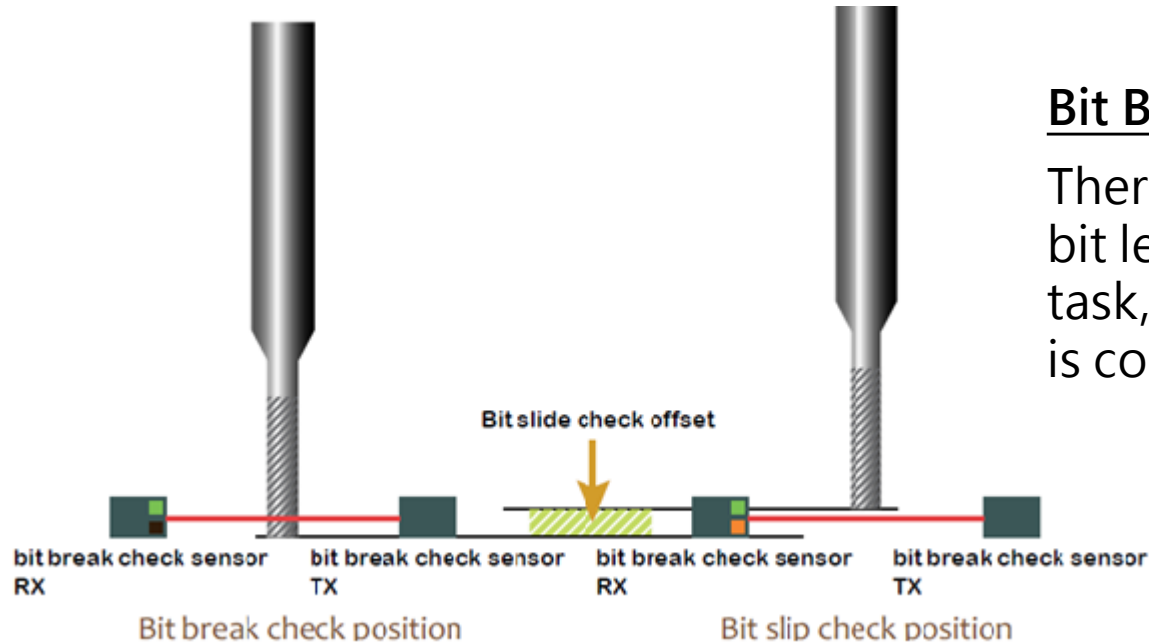

Features- Bit Sectioning

Routing Bit Sectioning

User sets up nominated distance for each bit section, and set the number of bit lifting according to the PCB thickness. Once it reaches nominated working distance, will automatically lift bit and use fresh bit section to work, until reaching the next nominated distance.

Features- Bit Break & Bit Slip

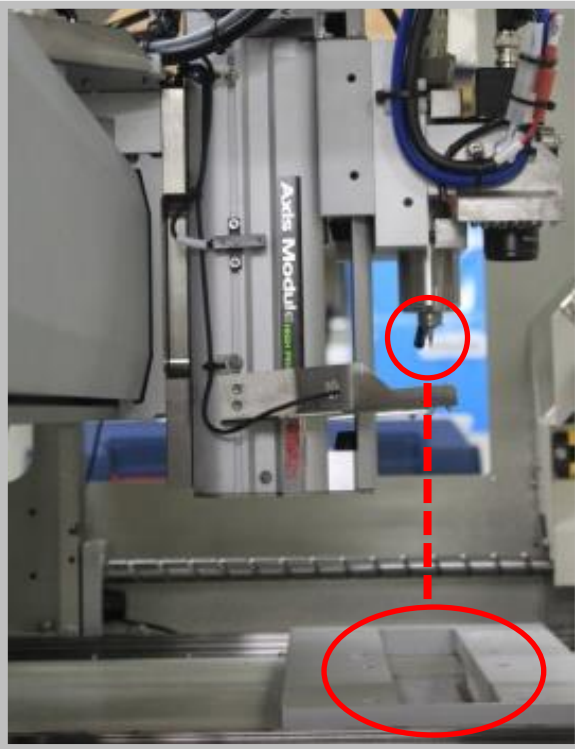

Bit Break Detection

There is a sensor to detect the bit length during each routing task, to make sure each working is correct and perfect.

Bit Slip Detection Sensor

It's standard for all series of Aurotek Depaneling systems to equip the bit drop sensor, to monitor and assure the in the correct position.

Features- Small dust Orifice

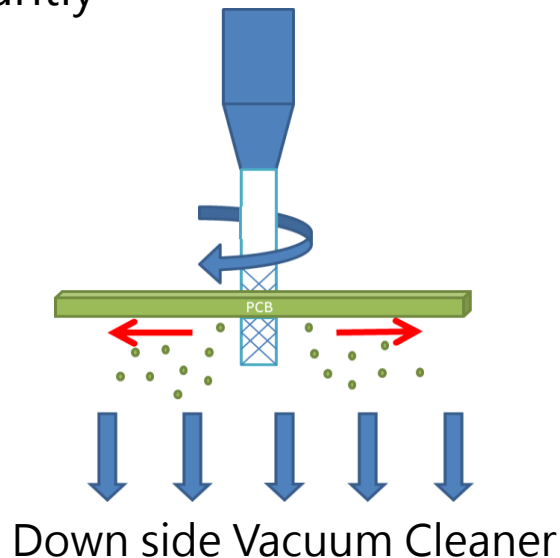

Small Dust Orifice

Vacuum suction area is narrow and under X axis. It will have better performance for dust collecting.

Equipping ionizer to remove ESD during cutting.

It increases the dust collection efficiency significantly

Features- User Interface & CCD Simulation

*Friendly User Interface

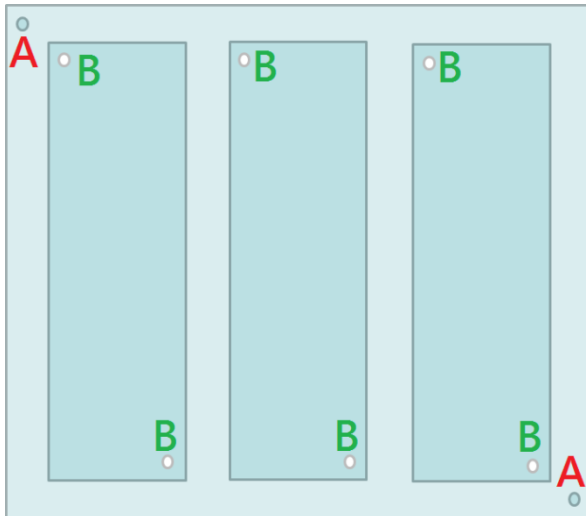

Window 7 OS and friendly user interface is easy for user learning and operating

*CCD Image Pathway Simulation

User could use CCD image to check & simulate the path of routing.
With 10 times zoom-in image it makes program editing.

Features- Fiducial Mark Alignment

PCB panel

A: Main Fiducial Mark

B: Local Fiducial Mark

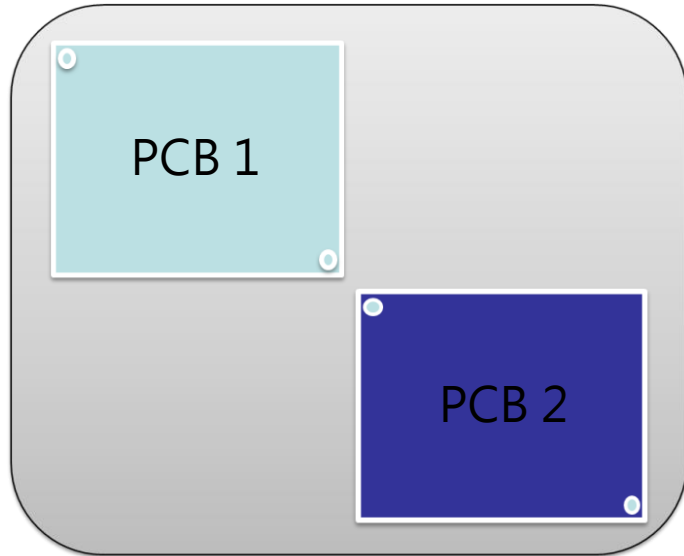

Multiple Fiducial Mark Alignment

Fiducial marks are automatically checked before each routing.

If misalignment is detected within tolerance, the routing path will be translated according to the fiducial position shift.

If misalignment is over tolerance, cutting process will be stopped immediately with error message and alarm.

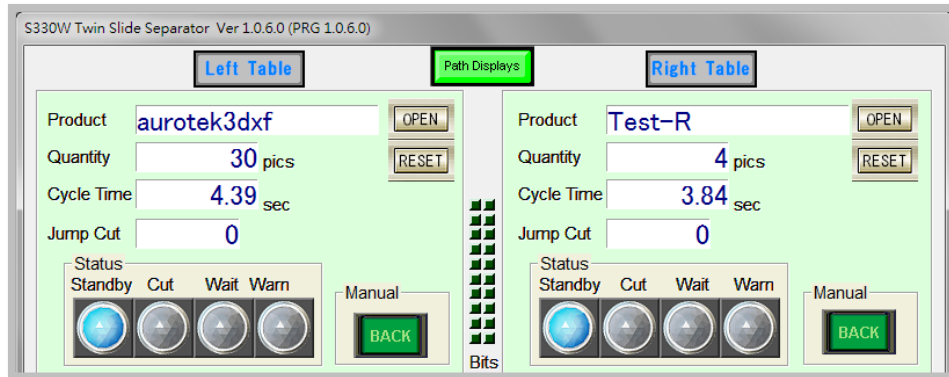

Features- Routing Path Copy

Routing Path Copy

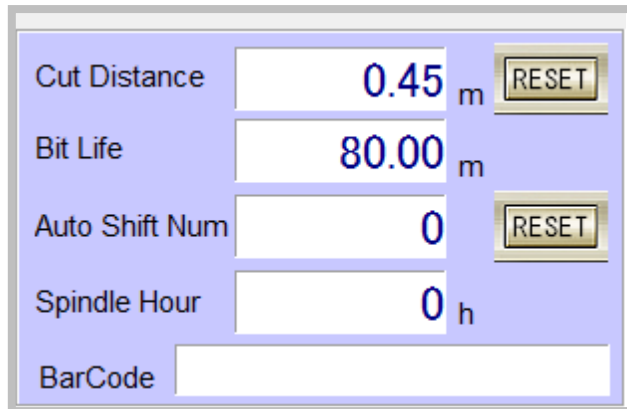

By aligning the fiducial marks, the program enables cutting path translation to other identical PCBs. It saves lots time for routing path setup.

Features- Production information

Production Information

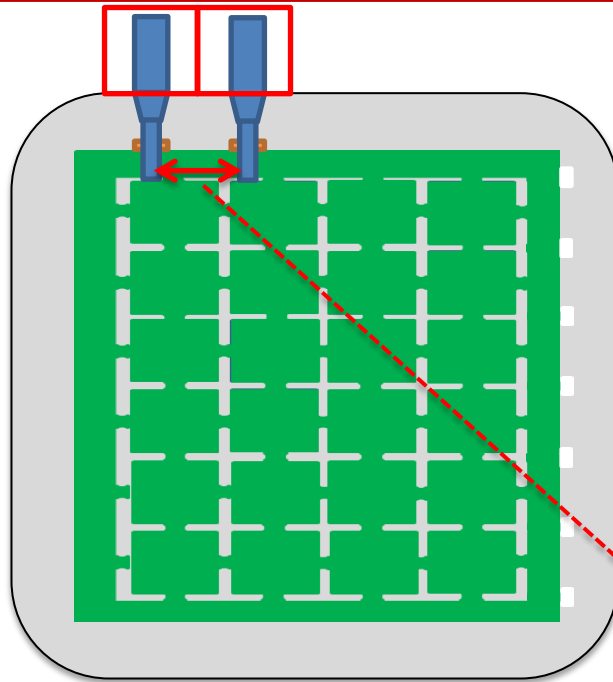

It show related information, as product name, made quantity and cycle time,

Bit & Spindle Life information

It shows cutting distance for bit. When it reaches the nominated length, the program will go to use next section of bit, or notify for bit change.

Option- Dual Spindle System

A. Dual Spindle System

Aurotek knows that production efficiency matters. With dual spindle system, it cuts off work cycle time while doubles up the overall output.

Two spindle distance:
43-113mm

SycoTec Spindle 4026 * 2

265W Max.58,000rpm (Torque Max.4.5Ncm)

► SycoTec

Option- Aluminum Board Cutting

B. Aluminum Board Cut System

Sycotec 4025DC-T spindle would be used for aluminum board routing

Specs: 470W Max. 30,000rpm, Torque: 15Ncm

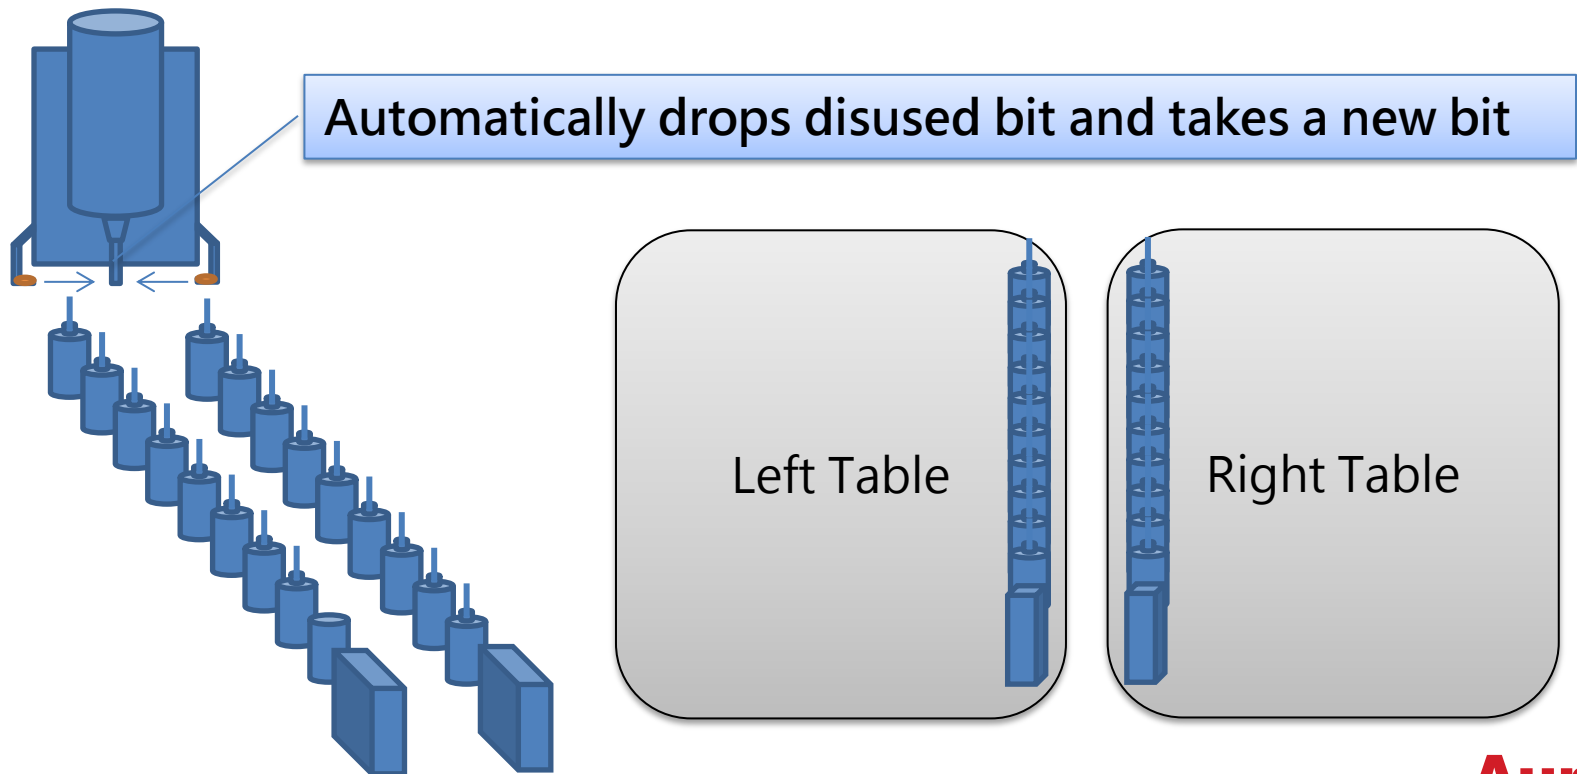

It is with higher power, lower rpm, and higher torque, to meet the character of Aluminum board

Option- Auto Bit Change

C. Automatic Bit Changer System

When the cutting blade reaches its limit, the system will replace with a new blade and resume production automatically. It dramatically reduces configuration time and maintenance related personnel costs.

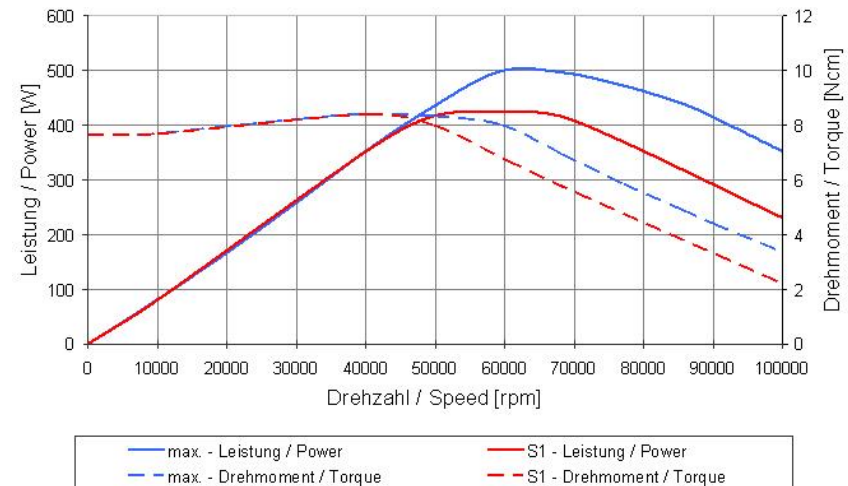

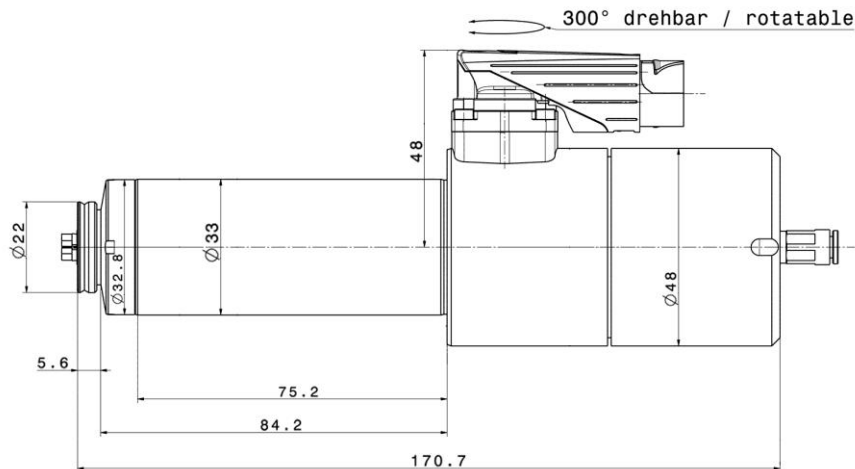

Option- Auto Bit Change

Spindles for Automatic Bit Changer System

To automatically change routing bit, SycoTec 4033 pneumatic spindle is required.

SycoTec 4033 AC Spindle:
500W Max. 100,000rpm (Torque Max.8.4Ncm)

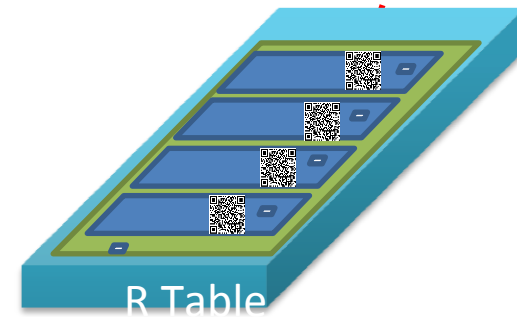

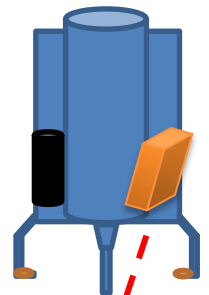

Option- Product Traceability & MES

Production Traceability / MES Function with Barcode Reader

It would automatically record the data as manufacturing Date, Time, Serial Number, Product Name, Production Quantity, Production Cycle time & Operator ID. However it would need to equip barcode reader to enable the function

	A	B	C	D	E	F	G	H	I	J	K	L
1	Date	Time	L PCB Board serial Number	L Product Name	L Qty.	L Cycle Time(sec)	Opeartor ID Number	R PCB Board serial Number	R Product Name	R Qty.	R Cycle Time(sec)	Opeartor ID Number
2	2017/4/12	17:15:58	1	DEMOL1	29	18.13	9527	1	DEMOR1	1	9.98	9527
3	2017/4/12	17:16:17	1	DEMOL1	29	18.13	9453	1	DEMOR1	2	13.36	9453

Option- Offline Program Editing

Offline Program Editing

User uploads DXF drawing into offline routing editing program, and complete the program editing on personal PC. Then saves the program into USB then download the program to router.
It' s simple & efficient.

Other Options

Routing Bit Diameter Detection

Checking the bit diameter before each working.
To ensure using the correct bit for routing

UPS Support System (for IPC 30 minutes)

To prevent the suddenly power failure in factory.

Spindle Speed Digital Adjustment

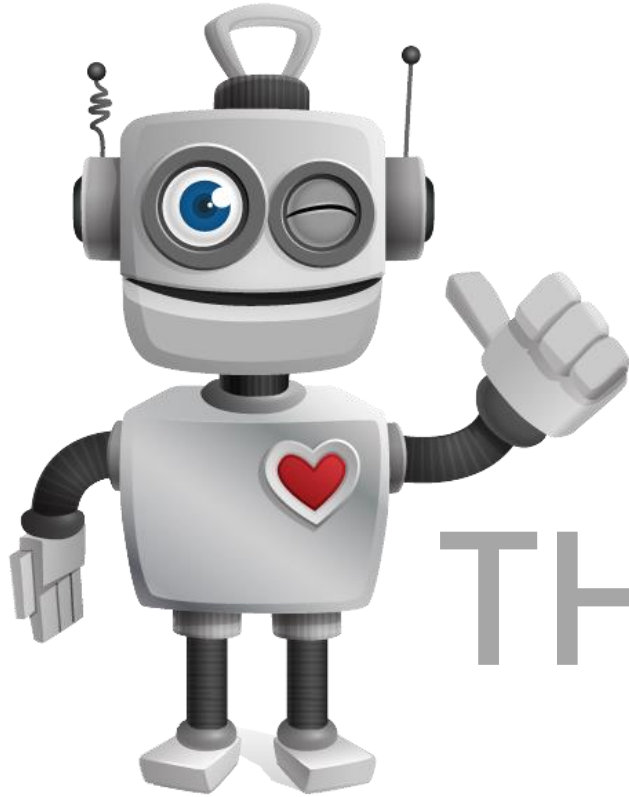

User could adjust spindle speed by operating software,
To use different speed for different PCB material

USB Backup System

USB keeps all original data and parameter.
User could backup router to original status if necessary
